Introduction

Here you describe what the topic and question of your report is (What the heck do you want to find out and why?)

Data

You describe your data and from where it comes from (provide source!)

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
summary(cars)
```

```
##      speed      dist
## Min.   : 4.0   Min.   :  2
## 1st Qu.:12.0   1st Qu.: 26
## Median :15.0   Median : 36
## Mean   :15.4   Mean    : 43
## 3rd Qu.:19.0   3rd Qu.: 56
## Max.   :25.0   Max.    :120
```

You can also embed plots, for example:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
